2026 Hospital at Home Management Summit

Redefining Acute Care: Advancing Innovation, Equity, and Excellence in Hospital at Home Models to Deliver Safer, Smarter, Patient-Centered Care – Where Healing Happens Best

March 26 – 27, 2026 • Loews Vanderbilt Hotel • Nashville, TN

Overview

    The healthcare landscape is rapidly evolving, and "Hospital at Home" (HaH) is at the forefront of this transformation. This innovative model of care brings hospital-level services directly into patients' homes – enhancing outcomes, improving patient satisfaction, and reducing healthcare costs. As healthcare systems face increasing demands for more patient-centered, efficient, and cost-effective solutions, the Hospital at Home model has emerged as a transformative approach to acute care delivery. This conference brings together healthcare leaders, clinicians, policymakers, researchers, and innovators to explore how care traditionally delivered within hospital walls can now be safely and effectively administered in patients' homes.

    Over the course of the event, participants will examine the clinical, operational, technological, and policy dimensions of Hospital at Home programs. Sessions will highlight lessons learned from established models, showcase emerging research and outcomes, and foster discussion around the challenges and opportunities of scaling this approach across diverse populations and settings. From reimbursement strategies and remote monitoring innovations to workforce training and equity in access, the conference will provide a comprehensive exploration of what it takes to implement and sustain high-quality care in the home environment.

Intended Audience

From Hospitals, Health Systems & Providers:

Chief Executive Officers, Chief Medical Officers, Chief Clinical Officers, Chief Operating Officers, Chief Financial Officers

Also, Vice Presidents, Directors, Managers & Executives of:

• Hospital at Home (HaH)	• Nursing
• Geriatric Care	• Virtual Care
